# EDI MANAGEMENT

Streamline your customer demand better – the customer drives your business system and therefore all of your decisions need to be made with this in mind!

Electronic Data Interchange (EDI) is still the preferred data exchange vehicle in the manufacturing industry, however it is also said to be the most painful part of an ERP integration project. Why? Because you need to have a unique skill set that covers both the technical as well as the business aspects of it.

Does this sound familiar: Honda Small Lot/Batch, Honda DSPS, TMMI, TMMK, TMMC, Chrysler Sequencing, GM Sequencing, Nissan, Ford cumulative requirements, Chrysler Commodity Procurement, Steel Resale Programs, PENTASAP, Chrysler Clause Codes, VW NLK, VW Mexico.

We are the right ones to provide you with an integrated solution in SAP, because pmc is a Honda Certified Solution Provider and has been for many years.

Some solution providers out there just provide technical mapping solutions others just provide some add-on's in SAP, but those of you who that have ever dealt with Honda knows that these methods do not work at all to make integrated EDI Business processes work in SAP.

We have a complete approach and cover the whole spectrum of the implementation:

## **Technical Integration:**

Connectivity

## **Translation and Mapping Technology:**

Either we provide you with Mappings using GXS TLE or we can work together with your designated EDI translation vendor. Our library of MRS and Mappings is above 500.

## **Business Logic:**

A set of customer specific business rules residing in SAP ERP covering all of the inbound and outbound trading partner requirements in a modular way. Our business logic covers customers out of NAFTA, APJ and Europe.

## **SAP Application:**

We are experts and have the unique skill sets to integrate your customers' requirements into SAP, regardless if you have to deal with a straight forward or a sequence customer.

SAP add-on's: various add-on's in customer integration, shipping and logistics execution are rounding up our services.

## **Solution alignment:**

pmcConnect and pmcAccelerate add-on's
