Extend the reach of SAP ERP processes using adobe Interactive forms

Extending your SAP ERP business processes to other partners like outside processors or smaller suppliers is not always easy. It can become absolutely necessary to integrate these partners if they play a vital role in your supply chain. We address this two-fold – either through our pmcMobile solution or a simpler

version using pre-populated adobe interactive forms which can be easily emailed to the supply chain partner.

The end effect is the same: Your vital partners become an extension of your business processes which ensures the required high quality standards. You might find this interactive technology interesting for other parts of your business. Please let us know your ideas!

Overview	Features	Benefits
<p>pmcInteractive is tailored as a low cost integration solution for smaller supply chain partners. It provides powerful integration scenarios for your outbound purchasing and inbound logistics execution processes.</p>	<p>Project and Program Management: Project Management tools get used throughout every deployment project.</p> <p>Adobe Interactive Forms: We have various adobe templates for sending interactive forms, like Bill of Lading or Barcode Labels to your supply chain partner.</p> <p>Integration Scenarios: The solution currently covers outbound purchasing and blanket POs as well as the inbound logistics execution. The inbound logistics is completely automated and can create inbound deliveries, packs them and just waits for the goods receipt executed by our pmcAutomate solution.</p> <p>SAP Application: Our SAP add-on "Supplier Cockpit" delivered in this solution provides you with the required monitoring for and management of the Integration Scenario</p>	<p>Reduce error possibilities.</p> <p>Streamline your receiving process.</p> <p>No limits in integration application.</p> <p>Full use of SAP ERP functions along the complete employee and supplier chain.</p> <p>Takes complexity out of manual processes.</p> <p>Reduces investments on your supplier side.</p>
